In the Claims

Applicant presents a full set of claims for the convenience of the Examiner. No amendments of the claims have been made.

1.-29. (Canceled)

- 30. (Previously presented) A micro-organism, comprising an expression vector that comprises promoters flanking a DNA sequence such that the promoters initiate transcription of said DNA sequence to produce double stranded RNA upon binding of a transcription factor to said promoters, whereby said double stranded RNA is produced in said micro-organism.
- (Original) A micro-organism according to claim 30, in which said expression vector comprises two identical promoters flanking said DNA sequence.
- 32. (Previously presented) A micro-organism according to claim 30, in which said expression vector comprises said DNA sequence in a sense and an antisense orientation relative to said promoters.
- (Original) A micro-organism according to claim 30, in which said transcription factor is a phage polymerase.
- 34. (Previously presented) A micro-organism according to claim 33, in which said promoters are selected from the group consisting of T7, T3 and SP6 promoters.
- (Original) A micro-organism according to claim 30, wherein said micro-organism is adapted to express said transcription factor.

Serial No.: 10/826,522 - 3 - Art Unit: 1635

Conf. No.: 2890

(Original) A micro-organism according to claim 35, wherein said transcription factor is
77 polymerase.

- (Previously presented) A micro-organism according to claim 30, in which said DNA sequence has been obtained from C. elegans.
- (Previously presented) A micro-organism according to claim 37, in which said DNA sequence is a C. elegans cDNA or cDNA fragment.
- (Original) A micro-organism according to claim 30, wherein the micro-organism is a bacterium.
- 40. (Original) A micro-organism according to claim 39, wherein said bacterium is E. coli.
- (Original) A micro-organism according to claim 40, wherein said E. coli is a RNAse III negative strain.
- 42.-69. (Canceled)
- (Previously presented) A micro-organism according to claim 30, in which said DNA sequence has been obtained from a pest.
- 71. (Previously presented) A micro-organism according to claim 70, in which said pest is a parasitic pest.
- 72. (Previously presented) A micro-organism according to claim 70, in which said pest is a nematode.
- (Previously presented) A micro-organism according to claim 72, in which said nematode is a parasitic nematode.

Serial No.: 10/826,522 - 4 - Art Unit: 1635

Conf. No.: 2890

74. (Previously presented) A micro-organism according to claim 70, in which said DNA sequence is a cDNA, cDNA fragment, or exon.

75.-79. (Canceled)

- 80. (Previously presented) A micro-organism according to claim 30, wherein said promoters are T7 promoters.
- 81. (Previously presented) A micro-organism according to claim 30, wherein said promoters are tissue-specific promoters.
- (Previously presented) A micro-organism according to claim 81, wherein said tissuespecific promoters are root-specific promoters.
- (Previously presented) A micro-organism according to claim 30, wherein the microorganism is a yeast cell.
